Art Unit: 2172:

DETAILED ACTION

1. This office action is in response to the application filed on 01/05/2001, which claims 1-20

Page 2

presented for examination.

Drawings

2. Applicants are required to furnish the formal drawings in response this office action. No new

matter may be introduced in the required drawing. Failure to timely submit a drawing will result in

ABANDONMENT of the application.

Claim Rejections - 35 U.S.C. § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness

rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention.

the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner

in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims

under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was

commonly owned at the time any inventions covered therein were made absent any evidence to the

contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and

invention dates of each claim that was not commonly owned at the time a later invention was made

.

Art Unit: 2172:

in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Page 3

4. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steadham et al (hereinafter "Steadham") US Patent no. 5,634,016 in view of Deinhart et al (hereinafter "Deinhart") US Patent no. 5,911,143.

As to claim 1, Steadham discloses a computer integrated event management system that coordinates the entire process of event planning and implemented using specialized software. In particular, Steadham discloses the claimed features "a repository having information associated with event management" (col.1, line 10-col.4, line 53; col.9, line 38-col.17); and "a digital interface permitting access to the repository" (col.6, lines 10-col.10). However, Steadham does not explicitly disclose the claimed "a restriction component restricting access to portion of information in the repository".

Deinhart, on the other hand, discloses the claimed "a restriction component restricting access to portion of information in the repository"(col.7, lines 5-15, lines 20-29; col.10, lines 15-50). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the teachings of the cited references. One having ordinary skill in the art would have found it motivated to do so because that would have provided Steadham's system the enhanced capability of restricting the possibility and probability of errors and confusion, thereby providing a higher system security.

Art Unit: 2172:

As to claim 2, Deinhart discloses the claimed feature "wherein the repository further comprises a

database having predesignated levels of access" ((col.7, lines 5-15, lines 20-29; col.10, lines 15-50).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention

was made to combine the teachings of the cited references. One having ordinary skill in the art would

have found it motivated to do so because that would have provided Steadham's system the enhanced

capability of restricting the possibility and probability of errors and confusion, thereby providing a

higher system security.

As to claim 3, Deinhart discloses the claimed features "a plurality of unique identification codes"

(col.7, lines 5-15, lines 20-29; col.10, lines 15-50); "a record having all unique identification codes

and a level of access corresponding to each unique identification code" (col.7, lines 5-15, lines 20-29;

col.10, lines 15-50); and "a software interface for receiving one unique identification code; searching

the record for the unique identification code, ascertaining the level of access corresponding to the

unique identification code, and restricting access to the information in the database according to the

ascertained level of access" (col.7, lines 5-15, lines 20-29; col.10, lines 15-50). Therefore, it would

have been obvious to one having ordinary skill in the art at the time the invention was made to

combine the teachings of the cited references. One having ordinary skill in the art would have found

it motivated to do so because that would have provided Steadham's system the enhanced capability

of restricting the possibility and probability of errors and confusion, thereby providing a higher system

security.

Page 4

Art Unit: 2172:

As to claim 4, Deinhart discloses the claimed feature "an access card having one unique identification

Page 5

number" (col.7, lines 5-15, lines 20-29; col.10, lines 15-50). Therefore, it would have been obvious

to one having ordinary skill in the art at the time the invention was made to combine the teachings

of the cited references. One having ordinary skill in the art would have found it motivated to do so

because that would have provided Steadham's system the enhanced capability of restricting the

possibility and probability of errors and confusion, thereby providing a higher system security.

As to claim 5, Steadham discloses the claimed feature "wherein the digital interface further comprises

permitting modification of the information" (col.15, lines 34-45).

As to claim 6, Steadham discloses the claimed feature "wherein the digital interface further comprises

effecting corresponding changes to the information where such changes are necessitated by

modification of the information" (col.3, lines 45-57; col.15, lines 35-45).

As to claim 7, Steadham discloses the claimed feature "capturing data related to an event display"

(col.3, lines 45-67); and "a presentation component for displaying the captured data" (col.4, lines 6-

53).

As to claim 8, Steadham discloses the claimed feature "video camera" (col.3, lines 35-40).

Art Unit: 2172:

As to claim 9, Steadham discloses the claimed feature "a software interface to facilitate visual

Page 6

presentation of the captured data" (col.39, lines 24-64).

As to claim 10, Steadham discloses the claimed feature "a functionality component for capturing data

at a production site" (col.1, line 10-col.4, line 50).

As to claim 11, Steadham discloses the claimed feature "a functionality component for capturing data

at an event site" (col.9, line 37-col.16).

The limitations of claims 12-20 have been mentioned in the rejection of claims 1-11 above. In

addition, Steadham discloses a plurality of reports embody webpage format (col.9, line 37-col.48);

an arrangement component embodies a webpage format (col.9, line 37-co.48); and an arrangement

component for facilitating travel accommodations (col.1, lines 10-67).

Art Unit: 2172:

Conclusion

5. Any inquiry concerning this communication or early communication from the Examiner should directed to **Jean Corrielus** whose telephone number is (703) 306-3035. The Examiner can normally be reached on the weekdays from 7:00am to 5:30pm.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, *Kim Vu*, can be reached on (703)305-9343.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 746-7239, (for formal communications intended for entry)

Or:

(703)746-7240 (for informal or draft communications, please label "PROPOSED" or "DRAFT")
Hand-delivered responses should be brought to Crystal Park II, 2021 Crystal Drive, Arlington.

VA., Sixth Floor (Receptionist).

Jean M. Corrielus

Patent Examiner
